

definer - Product Data

This range was specifically developed with the DDA in mind. The non-slip areas are filled with Safetytread's own 'Carborundum', a product that gives you and your visitors peace of mind as it offers some of the highest non-slip properties available in the marketplace for dry, wet and greasy conditions. The Carborundum infill far exceeds the requirements of the HSE and in fact offers some of the lowest potential for slip in the European market today (please see our test certificates for confirmation of this).

Our Disability Discrimination Act (DDA) compliant range of internal and external stair nosings that increase high visibility to your staircase.

CARBORUNDUM : DDA2, DDA3, DDA4, DDA5, DDA8, DDA9, DDA10
