### Metallic Non-Skid 14" Mats

Safetytread specialise in the manufacture of anti-slip stair nosing and ladder mats. These products are designed to deal with heavy usage in very extreme conditions.

We currently produce a range of NATO specified treads for our customers for use in naval ships and submarines (see below for more details).

### Metallic Non-Skid Double Nosings

As an alternative to rubber inserts, we can fill the treads with a carborundum filling. This is a very strong and extremely hard-wearing material.

This provides exceptional non-slip properties that will last for a very long period of time. This can be produced in a wide variety of colours to suit your specification.
